

**DRIVE SAFELY
Think twice, before you speed”**

Watch it –
For Judeans HSE Club

'Modern cars are capable of reaching immense speeds and it is important that people realise how dangerous high speed driving is. This footage demonstrates the utter destruction of a high speed impact. Industry experts EuroNCAP normally crash vehicles at speeds of 40mph when giving production cars a safety rating. See what would happen in a head-on collision at three times this speed.

Hitting the wall: In the blink of an eye, the front half of the hatchback is completely crushed

Going, going...: The driver compartment is next to buckle under the pressure.

Gone: The car seems to have almost completely disintegrated as the back end hurtles towards the wall

SPEED THRILLS BUT KILLS

**So Judeans make sure you travel safe. There is a beautiful life awaiting..
We need to see you achieve important milestones and enjoy that beautiful life.**
